

Just when you thought they couldn't get any better!

Flexcon's standard composite well tanks are already top of the line. ProLite SS takes them one step further by adding a stainless steel elbow and increasing their maximum working pressure to 150 PSI. Combined with Flexcon's patented, silver-ion-infused, anti-microbial CAD-2

diaphragm design inside, they're better than ever! If your customers demand the ultimate well tank, go with proven Flexcon performance.

ProLite SS, it just doesn't get any better than this!

Injection molded domes for precise, uniform wall thickness and consistently engineered dome profiles.

High tech spin welding process permanently fuses injection molded domes to the extruded cylinder.

150 *psi*, fiber wound composite shell sealed from the environment with weather resistant epoxy resin. Suitable for underground installation.

CAD-2 CAD-2 diaphragm technology: strong, 100% butyl diaphragm and copolymer polypropylene lower water chamber for maximum water and air separation.

Every Flexcon CAD-2 tank has a silver-ion-infused anti-microbial liner to help eliminate possible water born health hazards.

Tough as nails, noncorrosive, all stainless steel water connection.

Rugged base engineered to withstand maximum loads and extreme environmental conditions.

MATERIALS OF CONSTRUCTION

- **Top and bottom domes:** Injection molded copolymer polypropylene
- **Shell:** Extruded copolymer polypropylene
- **Outer shell:** Fiberglass-wound, coated with epoxy resin
- **Water chambers:** Top diaphragm is 100% butyl rubber, lower water chamber is anti-microbial, copolymer polypropylene
- **Base:** Copolymer polypropylene
- **Connection:** Stainless Steel
- **Air valve:** Easy to access brass valve with o-ring seal
- **Testing:** High pressure, seam weld, helium, final precharge check
- **Warranty:** 5 year limited

COMPOSITE TANK DIMENSIONS
